≡ APPLICATION PERMISSIONS

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.BLUETOOTH	normal	create Bluetooth connections	Allows applications to connect to paired bluetooth devices.
android.permission.CHANGE_WIFI_STATE	normal	change Wi-Fi status	Allows an application to connect to and disconnect from Wi-Fi access points and to make changes to configured Wi-Fi networks.
android.permission.ACCESS_WIFI_STATE	normal	view Wi-Fi status	Allows an application to view the information about the status of Wi-Fi.
android.permission.CHANGE_NETWORK_STATE	normal	change network connectivity	Allows applications to change network connectivity state.
android.permission.ACCESS_NETWORK_STATE	normal	view network status	Allows an application to view the status of all networks.
android.permission.ACCESS_COARSE_LOCATION	dangerous	coarse (network-based) location	Access coarse location sources, such as the mobile network database, to determine an approximate phone location, where available. Malicious applications can use this to determine approximately where you are.

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.ACCESS_FINE_LOCATION	dangerous	fine (GPS) location	Access fine location sources, such as the Global Positioning System on the phone, where available. Malicious applications can use this to determine where you are and may consume additional battery power.
android.permission.WAKE_LOCK	normal	prevent phone from sleeping	Allows an application to prevent the phone from going to sleep.
android.permission.CAMERA	dangerous	take pictures and videos	Allows application to take pictures and videos with the camera. This allows the application to collect images that the camera is seeing at any time.
android.permission.USE_FINGERPRINT	normal	allow use of fingerprint	This constant was deprecated in API level 28. Applications should request USE_BIOMETRIC instead.
android.permission.CHANGE_WIFI_MULTICAST_STATE	normal	allow Wi-Fi Multicast reception	Allows an application to receive packets not directly addressed to your device. This can be useful when discovering services offered nearby. It uses more power than the non-multicast mode.
android.permission.BLUETOOTH_CONNECT	dangerous	necessary for connecting to paired Bluetooth devices.	Required to be able to connect to paired Bluetooth devices.
android.permission.BLUETOOTH_SCAN	dangerous	required for discovering and pairing Bluetooth devices.	Required to be able to discover and pair nearby Bluetooth devices.

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.POST_NOTIFICATIONS	dangerous	allows an app to post notifications.	Allows an app to post notifications
android.permission.SCHEDULE_EXACT_ALARM	normal	permits exact alarm scheduling for background work.	Allows an app to use exact alarm scheduling APIs to perform timing sensitive background work.
android.permission.BLUETOOTH_ADMIN	normal	bluetooth administration	Allows applications to discover and pair bluetooth devices.
android.permission.USE_BIOMETRIC	normal	allows use of device-supported biometric modalities.	Allows an app to use device supported biometric modalities.
com.google.android.c2dm.permission.RECEIVE	normal	recieve push notifications	Allows an application to receive push notifications from cloud.
com.google.android.finsky.permission.BIND_GET_INSTALL_REFERRER_SERVICE	normal	permission defined by google	A custom permission defined by Google.
android.permission.RECEIVE_BOOT_COMPLETED	normal	automatically start at boot	Allows an application to start itself as soon as the system has finished booting. This can make it take longer to start the phone and allow the application to slow down the overall phone by always running.
android.permission.FOREGROUND_SERVICE	normal	enables regular apps to use Service.startForeground.	Allows a regular application to use Service.startForeground.
android.permission.INTERNET	normal	full Internet access	Allows an application to create network sockets.

🔍 MANIFEST ANALYSIS

HIGH: 1 | WARNING: 4 | INFO: 0 | SUPPRESSED: 0

NO	ISSUE	SEVERITY	DESCRIPTION
1	App has a Network Security Configuration[android:networkSecurityConfig=@xml/network_security_config]	info	The Network Security Configuration feature lets apps customize their network security settings in a safe, declarative configuration file without modifying app code. These settings can be configured for specific domains and for a specific app.
2	Activity (com.allegion.leopard.activities.SchlageSplashActivity) is vulnerable to StrandHogg 2.0	high	Activity is found to be vulnerable to StrandHogg 2.0 task hijacking vulnerability. When vulnerable, it is possible for other applications to place a malicious activity on top of the activity stack of the vulnerable application. This makes the application an easy target for phishing attacks. The vulnerability can be remediated by setting the launch mode attribute to "singleInstance" and by setting an empty taskAffinity (taskAffinity=""). You can also update the target SDK version (26) of the app to 29 or higher to fix this issue at platform level.

NO	ISSUE	SEVERITY	DESCRIPTION
3	Broadcast Receiver (com.google.firebase.iid.FirebaseInstanceIdReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: com.google.android.c2dm.permission.SEND [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
4	Broadcast Receiver (com.google.android.gms.measurement.AppMeasurementInstallReferrerReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.INSTALL_PACKAGES [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
5	Service (androidx.work.impl.background.systemjob.SystemJobService) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.BIND_JOB_SERVICE [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.

NO	ISSUE	SEVERITY	DESCRIPTION
6	Broadcast Receiver (androidx.work.impl.diagnostics.DiagnosticsReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.DUMP [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.

NO	SHARED OBJECT	NX	PIE	STACK CANARY	RELRO	RPATH	RUNPATH	FORTIFY	SYMBOLS STRIPPED
1	armeabi-v7a/libloader.so	True info The binary has NX bit set. This marks a memory page non-executable making attacker injected shellcode non-executable.	Dynamic Shared Object (DSO) info The shared object is build with -fPIC flag which enables Position independent code. This makes Return Oriented Programming (ROP) attacks much more difficult to execute reliably.	True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.	Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only.	None info The binary does not have run-time search path or RPATH set.	None info The binary does not have RUNPATH set.	True info The binary has the following fortified functions: ['__FD_SET_chk', '__FD_ISSET_chk', '__memcpy_chk', '__memmove_chk', '__read_chk', '__strcat_chk', '__snprintf_chk', '__strcpy_chk', '__sprintf_chk', '__strchr_chk', '__strncat_chk', '__strlen_chk', '__strncpy_chk', '__strrchr_chk', '__vsnprintf_chk']	True info Symbols are stripped.

FIREBASE DATABASES ANALYSIS

TITLE	SEVERITY	DESCRIPTION
App talks to a Firebase database	info	The app talks to Firebase database at https://schlage-sense-2e90f.firebaseio.com
Firebase Remote Config disabled	secure	Firebase Remote Config is disabled for https://firebase-remoteconfig.googleapis.com/v1/projects/800878081327/namespaces/firebase:fetch?key=AlzaSyCDceUBtUjpM-LAURvBQjY_ddIQwnpHw_8 . This is indicated by the response: The response code is 403

ABUSED PERMISSIONS

TYPE	MATCHES	PERMISSIONS
Malware Permissions	8/25	android.permission.ACCESS_WIFI_STATE, android.permission.ACCESS_NETWORK_STATE, android.permission.ACCESS_COARSE_LOCATION, android.permission.ACCESS_FINE_LOCATION, android.permission.WAKE_LOCK, android.permission.CAMERA, android.permission.RECEIVE_BOOT_COMPLETED, android.permission.INTERNET
Other Common Permissions	7/44	android.permission.BLUETOOTH, android.permission.CHANGE_WIFI_STATE, android.permission.CHANGE_NETWORK_STATE, android.permission.BLUETOOTH_ADMIN, com.google.android.c2dm.permission.RECEIVE, com.google.android.finsky.permission.BIND_GET_INSTALL_REFERRER_SERVICE, android.permission.FOREGROUND_SERVICE

Malware Permissions:

Top permissions that are widely abused by known malware.

Other Common Permissions:

Permissions that are commonly abused by known malware.

Description:

For over a century, Schlage has been trusted by millions of homes to help protect what matters most – peace of mind. The Schlage Home app lets you control and monitor your home from anywhere when your Schlage locks are paired to a home WiFi network. Through a secure, encrypted connection, easily lock and unlock your doors with the touch of a button, conveniently manage multiple homes, schedule unique access codes for trusted users, view lock history, and pair your Schlage locks with leading smart home systems. This app works with the Schlage Encode Plus™ Smart WiFi Deadbolt, Schlage Encode™ Smart WiFi Deadbolt and Lever, Schlage Arrive™ Smart WiFi Deadbolt, and Schlage Sense® Smart Deadbolt. SCHLAGE ENCODE PLUS SMART WIFI DEADBOLT, SCHLAGE ENCODE SMART WIFI DEADBOLT AND LEVER, SCHLAGE ENCODE PLUS SMART WIFI DEADBOLT AND SCHLAGE ARRIVE SMART WIFI DEADBOLT These locks feature built-in WiFi, so you don't need to purchase additional hubs or accessories for remote access. When your lock is paired to your smartphone and connected to your home's WiFi network, conveniently use the Schlage Home app to:

- Lock/unlock; Check your lock's status from anywhere
- Manage up to 250 unique access codes per lock (up to 100 codes for Schlage Encode Plus)
- Schedule access codes as always-on, recurring at specific times/days, or temporary with a specific start and end date/time
- Share virtual keys for full administrative access or guest lock/unlock only access
- View lock history log
- Customize push notifications to be alerted if specific access codes are used and when your door is locked/unlocked
- Select time delay for auto-locking
- Receive low battery advance warnings
- Set built-in alarm warnings (excluding Schlage Arrive)
- Pair with leading smart home speakers and ecosystems

SCHLAGE SENSE SMART DEADBOLT The Schlage Sense deadbolt features Bluetooth technology, allowing you to easily use your smartphone with the Schlage Home app to, within Bluetooth range:

- Lock/unlock and check your lock's status
- Manage up to 30 unique access codes per lock
- Schedule access codes as always-on or recurring at specific times/days
- Share virtual keys for full administrative access or guest lock/unlock only access
- View lock history log
- Select time delay for auto-locking
- Set built-in alarm warnings based on the type of disturbance detected

You must pair with a Schlage Sense WiFi Adapter and your home WiFi network to:

- Control and monitor your lock remotely
- Pair with leading smart home speakers and ecosystems
- Receive push notifications when specific access codes are used or when your door is locked/unlocked

The Schlage Connect Smart Deadbolt is not supported by the Schlage Home app. Visit Schlage's website for more information on compatible home hubs and apps for the Schlage Connect Smart Deadbolt. Works best in Google and Samsung flagship phones
